MOBILE PUMP MP200 - MAKE SNOW WHEREVER YOU WANT!

Thanks to the MP200 mobile pump, snowmaking in hard-to-reach places is even easier. This is the perfect solution for small ski resorts and stations struggling with terrain that does not allow the installation of elements of a traditional snowmaking system. Installed on a wheeled chassis with stabilizing arms, the 15 kW, 22 kW or 30 kW pump can handle up to 4 snow guns. The small size of the MP200 model allows it to move it quickly, and in combination with SUPERSNOW mobile snow gun it is ideal for i.e. cross-country skiing trails.

Mobile pump 15 kW

Mobile 15kW pump with semi-automatic filter

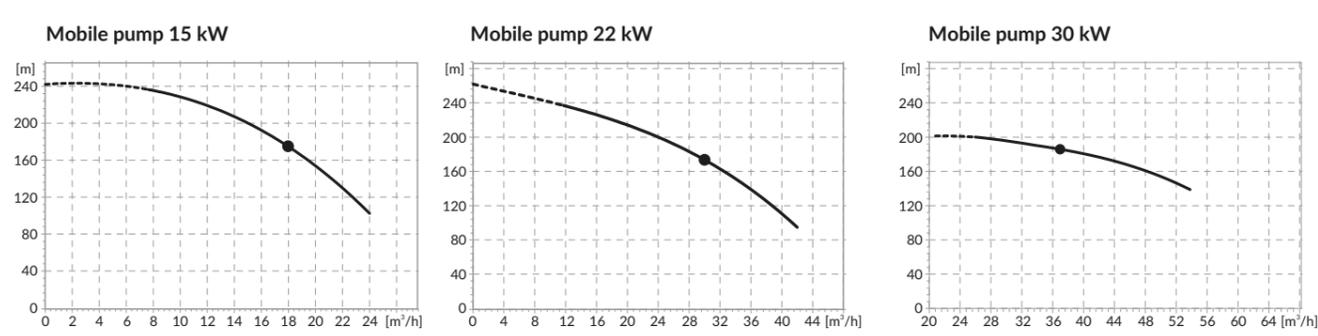

Water feed pump 2,2 kW

PUMP STATION TECHNICAL DATA

	15 kW	22 kW	30 kW
Power consumption	15 kW	22 kW	30 kW
Power supply	400 V (±10%)/50 Hz	400 V (±10%)/50 Hz	400 V (±10%)/50 Hz
Pump performance	24 m³/h	42 m³/h	50 m³/h
Maximum lift height	236 m	236 m	196 m
Weight of pump on wheeled chassis	430 kg	580 kg	615 kg
Transport dimensions of the pump	height	1930 mm	2100 mm
	width	2150 mm	2150 mm
	length	2390 mm	2390 mm

CHARACTERISTICS OF THE MP200 PUMPS

MOBILE CONTAINER PUMPING STATION MP500 - ENVIRONMENTALLY FRIENDLY

The operating of a snowmaking system can now be even more efficient with the SUPERSNOW mobile container pumping station. Despite its relatively small size, the MP500 functions just like a traditional pumping station. It works with any snowmaking system. The small dimensions and light weight make it possible to put it in any location, and the installation itself is extremely easy and quick. Since no foundations are needed to install the MP500 mobile container pumping station, it is extremely environmentally friendly. The standard offer includes pumps with a capacity of 55 kW to 132 kW, but on individual order pumps are also available from a higher capacity.

3D design

Design of pumping stations in 3D

3D design technology allows to create an extremely accurate project with care for every detail, which eliminate the risk of making a mistake. Visualization that takes into account every perspective, making the pumping station a perfect fit for the snowmaking system with high functionality. The optimal performance of the pumping station is a guarantee of success for any slope owner.
